Emacs Configuration

deepwaterooo

May 19, 2016

Contents

1 Updates

- gets csharp-mode {} works for String s = "{}", works for int [] a = $\{_{cursor\_}\}$ together with autopair global mode; but not for scope yet public void foo() $\{_{cursor\_}\}$.

-

- Will work 2 - 3 hours on Racket animation demo tonight for coming Wednesday till feel familiar and confident to be able to finish in time.

- Will study unity tutorial about 2 hours daily to build some background.

- Will continue work on tetris 3d tonight to try to finish, work on it tonight, tomorrow, the day after till finish.

- Will commit and checkin at least one reposotory tonight (either racket, or tetris) before tomorrow morning.

-

- Zsh Alt < – – > works, as well as M-f M-b works by enable Alt key.

- configured racket-mode for programming language theory course, together with rainbow-identifier mode.

2 TODOs

- configure and organize emacs better so that it won't take too much time when initializing.
